ABOUT ME

A driven and curious individual with a passion for technology, innovation, and continuous learning. I have a growing foundation in computer engineering, and I enjoy applying my skills to solve real-world problems through creative thinking and collaboration. Known for being adaptable, proactive, and detail-oriented, I thrive in fast-paced environments and am eager to take on challenges that push me to grow. I'm currently in last year of my bachelors and seeking opportunities where I can contribute meaningfully, learn from experienced mentors, and build impactful solutions.

EDUCATION

August 2023-Pursuing	Bachelor of Technology in Computer Engineering
K. J. Somaiya Institute of Technology	Affiliated to Mumbai University (Autonomous)
June 2021- May 2023	12 I.S.C.
St. John Universal School	Council For The Indian School Certificate Examinations
July 2021	10 I.C.S.E.
Vissanji Academy	Council For The Indian School Certificate Examinations

TRAINING EXPERIENCE

May 2025 - June 2025	Labmentix Pvt. Ltd.	Intern - Artificial Intelligence and Machine Learning
May 2025 - June 2025	Cladroid Technologies	Intern - Cybersecurity
December 2024 - January 2025	Cladroid Technologies	Intern - Machine learning
December 2025 - January 2026	Cladroid Technologies	Intern - GenAi and Agentic AI

PROJECT

Animal Welfare Web

- Description: A user-friendly platform that connects people with stray animals available for adoption, promoting animal welfare and helping pets find loving homes.
- Technologies: HTML, CSS, JavaScript, PHP (Backend), SQL Database

See For Me

- Description: A cross-platform mobile app that assists visually impaired users by detecting objects in images and providing real-time audio feedback. Includes multi-language support across 10 Indian languages to enhance accessibility.
- Technologies: Flutter, Claude API, Google Text-to-Speech (TTS)

SolarScope

- Description: An AI-powered web system designed to analyze aerial and satellite imagery for renewable energy planning. It first detects buildings and rooftops, then identifies existing solar panels using a sequential deep-learning pipeline, and provides visual outputs plus GeoJSON results for faster, data-driven decision making.
- Technologies: Python, Flask, PyTorch, DeepLab V3+, Faster R-CNN, OpenCV, NumPy, GeoAI, GeoJSON, HTML, CSS, JavaScript.

Forest Fire Detection System

- Description: An IoT system that monitors temperature, humidity, CO gas, and soil moisture to detect fire risks and send real-time WiFi alerts for early intervention.
- Tech: Arduino Uno, ESP8266-01, MQ-7, DHT11, Soil Moisture Sensor

SKILLS

- Problem Solving
 - Python
- Ethical hacking
 - Communication
- Java
 - Flutter
- UI/UX Design
 - Object-Oriented Programming

CERTIFICATIONS AND CO-CURRICULAR ACTIVITIES

- 2nd Prize (Software Category) - National Level Project Competition at F. C. Rodrigues Institute of Tech.
- 3rd Prize (Software Category) - National Level Project Competition at Lokmanya Tilak College of Engineering
- Javascript and PHP programming course on Udemy in December 2024
- Artificial Intelligence course on Udemy in July 2022
- Ethical hacking course on Udemy in July 2022
- Treasurer at Institute of Electronics and Telecommunication Engineers - Student Forum , K J Somaiya Institute of Technology , since September 2024
